Lightning-fast VPN connection

An upgrade from its predecessor, Flint 2's VPN speeds are better and faster. Flint 2 delivers up to 900 Mbps with WireGuard and 190 Mbps with OpenVPN. Effortlessly configure your VPN client via the admin panel, providing instant protection for all connected devices, or establish a VPN server.

Whether you're working remotely, wrapping yourself in entertainment, or want an extra layer of privacy and security, your VPN speeds won't mean trouble for you.

WireGuard® is a registered trademark of Jason A.Donenfeld.

WireGuard
Max. 900Mbps

OpenVPN

Max. 190Mbps

* Tests conducted on a local network. Real world speeds may differ depending on your network configuration.

* OpenVPN and WireGuard speeds will be slower when running the device as a server. Results above are in client mode.

of your network and devices. Over 5,000 ready-made plug-ins and applications are at your disposal. Simply browse, install, and manage packages within the router's admin panel.

Large Storage

Higher storage capacity satisfies stable online connections for over a hundred devices and meets the needs of DIY users for installing more plugins.

Powerful CPU

Quad-Core 2GHz Processor comes with powerful CPU processing capability that enhances overall product stability and provides even better performance.

Extended Coverage

Equipped with 8 high-power FEMs, expanding WIFI coverage range, meeting WIFI coverage requirements for medium-sized homes, ensuring strong signals throughout the house.

Keep the Family Protected

Are too much screen time and exposure to inappropriate content your top concerns as a parent? In collaboration with Bark (an award-winning child-monitoring tool), Flint 2 offers parental controls* built in to the router. In a few clicks, you can filter out certain websites and content categories, enable safe search on your child's search engine, and manage their usage effortlessly.

*An active Bark subscription is required. Alternatively, use Flint 2's existing parental controls without an additional cost.

DFS Certification in US, CA, EU and UK

Flint 2 is approved to use DFS (Dynamic Frequency Selection), letting the router's 5GHz network use additional frequencies normally reserved by military, satellite, and weather radar applications. The selection of additional channels can lower network congestion under high density network environments.

Protected by Multiple Layers of Security

WPA3 protocol

The latest Wi-Fi security protocol with extensive improvements including preventive measures against password brute-force attacks, user-to-user snooping, and individualized encryption in public Wi-Fi networks.

DNS over HTTPS & DNS over TLS

Protecting domain name system traffic and preventing data eavesdropping from malicious parties, advertising platforms, and ISPs by encrypting plaintext DNS traffic using HTTPS and TLS protocols.
AdGuard Home

Using a DNS server for blocking unwanted tracking and includes a user-friendly web interface to filter selected digital advertisements.
