

Synergy 21 LED Garten Solar Lampe - Flame Serie

kwh/1000h:	1,00
Lumen:	100
Watt:	1,0
Nennlebensdauer:	35000 Std.
Schaltzyklen:	50000
Opt. Umgebungstemp.:	25 °C

Solar Energy Charge
Power: 1W
Voltage:5V
Kelvin: 1300-1500K
LEDs Quantity: SMD2835 96PCS
Size: 120*(45-1000) mm
IP Grade: IP65
Battery:2200mA
Control: on/off
Eingebauter Dämmerungssensor: Dunkel=an, Hell=aus

LED SOLAR LIGHT CONTROL

PRODUCT DESCRIPTION

Solar energy light is a new product to use solar power for producing electricity. This light uses high-efficiency solar panels, which can transform solar energy to electric energy and stock it into storage battery. Then it can provide energy to LED light for shining.

The unique optical controlled technology can ensure the light auto charging in daytime. Then, the light can automatically lighten in the night. In addition, the light is easy to install, waterproof and anti-sunburn.

ADDITIONAL NOTE

1. The lamp should be charged for 5 hours under the sunlight before using.
2. If there is no good sunlight in 3 months, the battery may be out of power. So you have to charge it with bright sunlight. When it's fully charged, it can function normally.
3. If the light blinks, it shows that the power is low. Thus, you have to charge it with the sunlight right away. Otherwise, the device will stop functioning soon.
4. If there is no strong sunlight or during the winter season, especially at the north countries, it may take longer time to fully charge the device and this is a normal situation for solar products.

WARNING

1. Keep the device away from fire, water and avert the product immersed in water in order to avoid explosion, leakage.
2. The device does not have any charger.
3. No one except professional technicians should attempt to disassemble the device in order to avoid damaging the product.
