Registering the headset to M-series base stations

1. Set up an extension for the headset on the base station and put the base station into registration mode for handsets. Please refer to the base station manual on how to do it. The headset's IPEI number is on the box label.
Note: To be able to register a headset, you must set the AC code on the M900 **Extensions** page to 0000.
2. Press the CALL key and the two VOLUME keys simultaneously for more than 5 seconds to put the headset into registration mode, as indicated by short blue flashes and the voice prompt announcing "registering."
3. If the headset has been registered, the voice prompt announces "heaset subscribed," and the headset has been added to the extensions page (Fig. 1). It can now receive calls at the assigned extension number.

	Idx	IPEI	Handset State	Handset Type FW Info	FWU Progress	VoIP Idx	Extension	Display Name

Pairing the headset with a handset

It is possible to pair the headset with a handset registered at the base station. The headset will get the same extension number as the handset, and you can assign its former extension number to another terminal.

1. On the extension page, click on the IPEI of the handset. The handset page opens.
2. From the drop-down box of **Paired Terminal**, select the terminal idx of the headset (Fig. 2).

IPEI:	<input type="text" value="0328D"/>	IPEI:	<input type="text" value="0328D1"/>
Paired Terminal:	<input type="text" value="No Paired Terminal"/>	Paired Terminal:	<input type="text" value="Terminal Idx 4"/>
AC:	<input type="text" value="FFFF"/>	AC:	<input type="text" value="FFFF"/>
Alarm Line:	<input type="text" value="No Alarm Line Selected"/>	Alarm Line:	<input type="text" value="No Alarm Line Selected"/>
Alarm Number:	<input type="text"/>	Alarm Number:	<input type="text"/>

Fig. 2

3. Click **Save**. The headset is now registered with the same extension number as the handset and can also be used to call numbers dialed on the handset's keypad.
